

Day 96

Topic: Career Guidance

Objective: To build a professional profile and prepare for cybersecurity job interviews.

Theoretical Concepts:

We explored career paths: SOC Analyst, Penetration Tester, Security Consultant. We discussed industry certifications: CEH, CompTIA Security+, OSCP, CISSP.

Practical Work:

We optimized our LinkedIn profiles, adding the skills learned during this training. We built a technical resume highlighting our hands-on experience with Kali Linux, Nmap, and Metasploit. We conducted mock interviews focusing on technical questions (e.g., "Explain the 3-way handshake").

Tools Used: LinkedIn, Resume Tools.

Outcome: Preparedness for entering the cybersecurity workforce.
